Evolving and Sustaining Ocean Best Practices III
02-03 December 2019

International Oceanographic Data and Information Exchange (IODE)
of the Intergovernmental Oceanographic Commission of UNESCO
Project Office for IODE, Pakhuis 61, Wandelaarkaai 7, 8400 Oostende, Belgium

Workshop Agenda
The workshop outcomes will be: (1) recommendations for best practice synthesis (2) an articulated strategic direction for ocean best practices and 3) recommendations for further Ocean Best Practices System development/implementation embedding outcomes from community input.

PANEL MODERATORS NOTES

- Moderator should encourage and motivate discussion from the audience.

- For the panels, moderators should work to identify key questions that should be covered in the breakout sessions in the afternoon (except capacity building for which the breakout is before the panel). Moderator may want to think of a few questions to start the discussion if necessary.

-
- It would be good if the panelists can include the questions we have posed (under the Scoping column in agenda) in their five minute presentations.

- We request that all presentation material be free for inclusion in proceedings. if this is a problem let the organizers know beforehand.

- Can panelists provide a short CV and photo

- Panelist 'presentation' not more than 5 mins each and perhaps less to give more time for participant discussion

- presentation laptop and screen available (bring on USB)

- microphone available
