1. Background

The IOC Ocean InfoHub (OIH) Project is a new initiative to streamline access to ocean science data and information for management and sustainable development. Funded by the Government of Flanders (Kingdom of Belgium), the project started in April 2020 and will run for three years. The OIH is coordinated by the IOC Project Office for IODE (Oostende, Belgium). The OIH will establish and anchor a network of regional and thematic nodes that will improve online access to and synthesis of existing global, regional and national data, information and knowledge resources. The project will centre on an openly accessible web platform designed to support interlinkages and interoperability between distributed resources including existing clearinghouse mechanisms (CHM). The initial focus of OIH will thus be on (i) experts, (ii) institutions/organizations, (iii) research data and information infrastructures and their capabilities and services offered, (iv) projects, (v) research vessels, (vi) education and training opportunities, (vii) funding programs and other opportunities, (viii) documents and publications, (ix) manuals, guidelines, standards and best practices, (x) metadata catalogues for specific variables and (xii) access to data sets and/or data products relevant to particular program priorities (e.g. the SDGs and Essential Ocean Variables). The project will benefit marine and coastal stakeholders across the globe, but its initial focus will be on responding to requests for data products and services from three regions: IOCAFRICA, Latin America and the Caribbean (LAC) and the Pacific Small Island Developing states (SIDS) to meet their unique user community (thematic and language) requirements. The initial priorities for the Project will be to develop communities of practice for the three pilot regions, as well as to formalize partnerships with other UN agencies and key international partners.

The OIH Project has supported the development of a global ODIS (Ocean Data and Information System) Architecture (ODIS-Arch) which underpins the interoperability between local, regional and thematic infrastructures. The OIH Project and its partners have successfully tested a prototype implementation of the Ocean Data and Information System (ODIS) using a schema.org-based interoperability architecture (ODIS-Arch) to allow independent data systems (ODIS nodes) to push and pull (meta)data. ODIS-Arch comprises a set of patterns specifying how to populate schema.org
/ JSON records for a set of thematic areas, including experts and institutions, documents, vessels, and training opportunities.

To leverage the above, OIH has developed a system to merge the ODIS-Arch (meta)data shared by ODIS nodes and provide global search and discovery using knowledge graph technology. A web interface for this system is under development to allow broad usability.

**The Ocean Data and Information System (ODIS) Project** was recently approved as a stand-alone project (Decision IOC-XXX/7.2.2 (ODIS)) and will be concerned with further development of the Ocean Data and Information System) Architecture (ODIS-Arch), engagement with additional global partners, and ongoing support of the digital ecosystem.

2. **Contractor brief**

Within the context of the approved programme and budget for 2020-2021 (40C/5) and 2022-2023 (41C/5), MLA1, and in particular Decision A-31/3.4.2 (II) (Establishment of the IOC Ocean Data and Information System Project (ODIS)), we seek an Individual Consultant to assist in the development of technology required for the implementation of the IOC Ocean Data and Information System (ODIS).

Quality controlled extensions of ODIS-Arch are now needed to allow ODIS nodes to exchange (meta)data about further thematic areas, such as projects, infrastructures, and data products suitable for use as GOOS Essential Ocean Variables. Subsequent tasks needed to fully leverage development of new patterns include testing the compatibility of these patterns with the existing architecture, making links between the patterns, and training partner nodes to independently suggest modifications to ODIS-Arch (via our publicly available code repository).

3. **Specific tasks and expected outputs (Description of work)**

Under the supervision of Peter Pissierssens (IODE Programme Manager) and Arno Lambert (IT manager, IODE project office) the Individual Consultant shall:

(i) Extend, create, and validate new ODIS-Arch schema.org patterns for existing or new thematic areas identified in consultation with the Ocean InfoHub Project technical team and OIH/ODIS partners. These will include:

- Observing infrastructures (e.g. fixed or mobile observatories, mooring arrays, remote sensing arrays\(^1\)) with guidance from the ODIS team.
- Projects (in collaboration with the IOC Ocean Data and Information system Catalogue of Sources (ODISCat - https://catalogue.odis.org/)

\(^1\) [https://www.tandfonline.com/doi/full/10.1080/1755876X.2015.1049883](https://www.tandfonline.com/doi/full/10.1080/1755876X.2015.1049883)
Datasets about any of the GOOS Essential Ocean Variables\(^2\) (using biological variables as a demonstration, in coordination with ODISCat and OBIS, and the new GOOS Biology data manager\(^3\)).

Patterns to minimally describe generic datasets (reusing thematic patterns as appropriate) - developed in collaboration with ODIS-Arch implementers and members of the IODE Project Office and ODIS team.

(ii) Train regional partners in the implementation of ODIS-Arch to 1) integrate their system into the ODIS (meta)data exchange network, 2) push and pull (meta)data from OIH and/or regional hubs, and 3) co-developing the ODIS-Arch via branch/fork-and-pull requests to the IODE GitHub repository.

(iii) Work with the regional partners to integrate their systems into ODIS via exposure and harvesting of ODIS-Arch-compliant records.

(iv) Ensure that new patterns and partners are harvested and discoverable via the OIH Knowledge Graph.

(v) Respond to user queries.

(vi) Report technical issues to the ODIS Technical working group (Work Package 2)

(vii) Provide monthly reports on work carried out.

(viii) As directed by the supervisor, carry out other duties as needed.

**Relationship with regional partners**

As described in (iii), The Individual Consultant will collaborate and guide regional partners in implementing ODIS-Arch and participating in ODIS. In general, the regional partners will be asked to:

(a) Integrate their local systems and/or hubs into ODIS by exposing (meta)data using selected ODIS-Arch patterns or compatible schema.org records (partially or wholly overlapping with ODIS-Arch records). When internal work is needed to support this task, sustainably enhance local data management practices to provide readily and accurately exposable (meta)data.

(b) Ensure that (meta)data shared in (i) are validly integrated into and exposed by OIH and/or interoperating regional hubs

(c) Co-develop ODIS-Arch by modifying existing or adding new patterns to better serve regional needs using branch/fork-and-pull requests to the IODE GitHub repository.

(d) Develop regionally tailored documentation for all activities carried out to promote sustainable capacity development.

\(^2\) [https://www.goosocean.org/eov](https://www.goosocean.org/eov)

(e) Report technical issues and further opportunities for collaboration to the ODIS Technical working group (Work Package 2)

(f) Provide reports on work carried out.

Once the contract has come into effect, it may be terminated by either party at any time before the expiry date with 2 weeks written notice for contracts of 6 months or less, or 1 month’s written notice if the contract is for more than 6 months. If UNESCO terminates the contract, the Individual Specialist is entitled to an indemnity of 5% of payment for each remaining aggregated period of service equivalent to one month, subject to a maximum payment of 30% of the total amount. In the event of termination by the Individual Specialist, or of the inability of the Individual Specialist to carry out fully its terms, UNESCO may deduct from any payments due an amount equivalent to any losses caused to the Organization, taking into consideration the extent to which the assignment has been completed.

3. Notwithstanding the provisions of Article XII, paragraphs 1 and 2, in the event of breach of contract, including false declarations, on the part of the Individual Specialist, the contract may be immediately terminated by UNESCO without notice or indemnity.

Article XIII. Arbitration

1. Any controversy or dispute concerning the execution or interpretation of this contract shall be settled by negotiation between the parties.
