

Deep Sea Research in the Western Tropical Atlantic

Challenger 150 in the Western Tropical Atlantic

challenger150.world

Challenger 150 programme is a vehicle for coordination of deep-sea research globally towards a set of common objectives.

Build a community of deep-sea scientists and stakeholders in the region

The programme incorporates 3 principles:

- 1. Co-development and co-creation of contributing regional research projects*
- 2. Investment in training for scientists from economically developing countries*
- 3. Sharing research products*
