

Vision for a thriving regional coordination ecosystem

- criteria and commitment to **GOOS principles** and **clearly expressed attributes of a GRA**
- a focus on **alignment, sharing**, and working on **common integrated system elements** rather than on **implementation**
- **less rigid entry / exit**, ability to deal with underperformance
- no exclusivity by geography, but communicated clarity on scope
- clear expression of the value to GOOS and to regional stakeholders
- connection **down value chain**, and to **regional governance structures** as users and funders
- appropriate support from GOOS
