GOOS SC-10, part 2

Short introduction

Toste Tanhua, Anya Waite

Co-chairs, GOOS Steering Committee

Where are we with GOOS?

- This is the second part of the 10th Steering Committee meeting of GOOS (first part in late April).
- We will reflect on items of strategic importance.
- We have had a few shorter sessions in between
- COVID-19 still prevent many of us from traveling, so that an in-person meeting has been difficult, and likely remain so also next year
- Reflect on the best way to communicate and work the next year
- Positive is that we can use resources for personnel
- For task teams, we will review progress and priorities

- We will reflect on the messages from the Regional Workshop

- Thursday will be an in-camera session for SC members only.

GOOS SC-10 Agenda

– connection to GOOS Strategy implementation

	SO1	SO2	SO3	SO4	SO5	SO6	SO7	SO8	SO9	SO10	SO11	GOOS Action
	Coms and advocacy	Value Chain partners	Evaluate impact	User application	Design guidance	Strengthen observing	FAIR Data	Innovation and tech	Capacity Devel.	Human impacts	Governance

Observing Together												9.10
CoastPredict												6.10
TT's												2.3, 6.3, 7.1, 11.2,

Vision

A truly global ocean observing system that delivers the essential information needed for our sustainable development, safety, wellbeing and prosperity

Mission

To lead the ocean observing community and create the partnerships to grow an integrated, responsive and sustained observing system

Building on the GOOS 2030 Strategy
