Chair's Report for Intergovernmental Coordination Group Indian Ocean Tsunami Warning & Mitigation System (IOTWMS)

Prof Dwikorita Karnawati
Chair, ICG/IOTWMS

28 November 2022

ICG/IOTWMS

- **12th Session** in Kish Island, Iran in Mar 2019, with **8/25** Member States attending
- **Intersessional** Online Meeting in Nov 2021
 - Very successful, with over 100 participants from **19/25** Member States, including for first time large number representatives from Disaster Management Organisations (DMOs)
- **13th Session** Nov 2022 in Bali, Indonesia
 - Face-to-face and online participation to help maintain increased participation shown in intersessional meeting, with **17/25** Member States participating
 - Preceded by “Indian Ocean Tsunami Ready Workshop”

Support for 25 Active IOTWMS Member States

1. Ongoing support for further two years (2022-23) (USD\$310K per year) from Govt of Australia, through Australian Bureau of Meteorology, to support ICG/IOTWMS Secretariat

2. ICG/IOTWMS Secretariat during intersessional has provided support for 18 meetings of ICG/IOTWMS, 12 other workshops or webinars, 25 UNESCAP activities, most in online or hybrid mode due to COVID

3. Support for further five years (2022-2027) (USD\$130K per year) from Government of Indonesia, through BMKG, to support Indian Ocean Tsunami Information Centre (IOTIC)

4. Phase 1 of UNESCAP Project “Strengthening tsunami warning in the North-West Indian Ocean through regional cooperation” successfully completed 30 October 2021

5. Phase 2 of UNESCAP Project funding USD\$280K on track to be completed Dec 2022

6. IOTIC and IOC Secretariat supported several activities on World Tsunami Awareness Days (WTAD) 2019, 20, 21, 22

Chair Support and Representation ICG/IOTWMS

- IOC Assembly (2019/21)
- IOC Assembly Exec Council (2020/22)
- TOWS-WG (2020/21/22)
- 13th Session of the Intergovernmental Coordination Group for the Indian Ocean Tsunami Warning and Mitigation System (2022)
- Inter-sessional Meeting ICG/IOTWMS (2021)
- 12th Session of the Intergovernmental Coordination Group for the Indian Ocean Tsunami Warning and Mitigation System (2019)
- ICG/IOTWMS Steering Group (2020/21/22)
- UNESCO-IOC Tsunami Ready Recognition to Venkatraipur and Noliasahi Villages in Odisha State, India by Virtual Ceremony (2020)
- Pre-IOWave20 Webinar on Standard Operating Procedures for Tsunami Early Warning and Emergency Response (2020)
- IOTWMS-IOTIC Post-IOWave20 Webinar on Lessons Learnt during Exercise Indian Ocean Wave (2020)
- ICG/IOTWMS Intersessional Meeting of Working Groups, and Steering Group (2020)
- ICG/IOTWMS Intersessional Meeting of Working Groups, Task Teams and Steering Group (2019)

IOTWMS - The Three Pillars

Risk Assessment and Reduction

Systematically collect data and undertake risk assessments

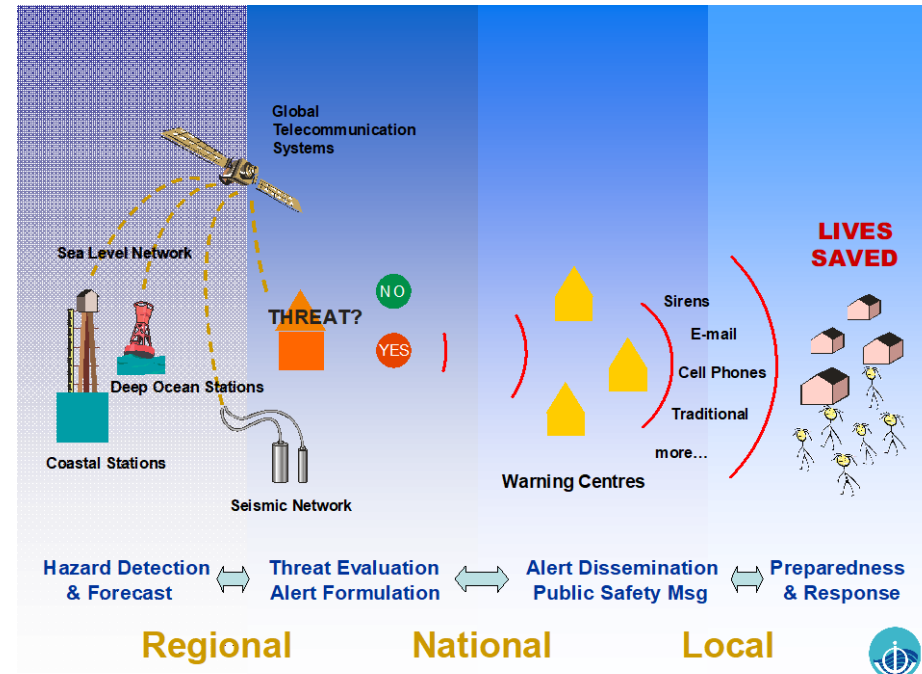

Detection Warning and Dissemination

Develop hazard detection, monitoring and early warning services

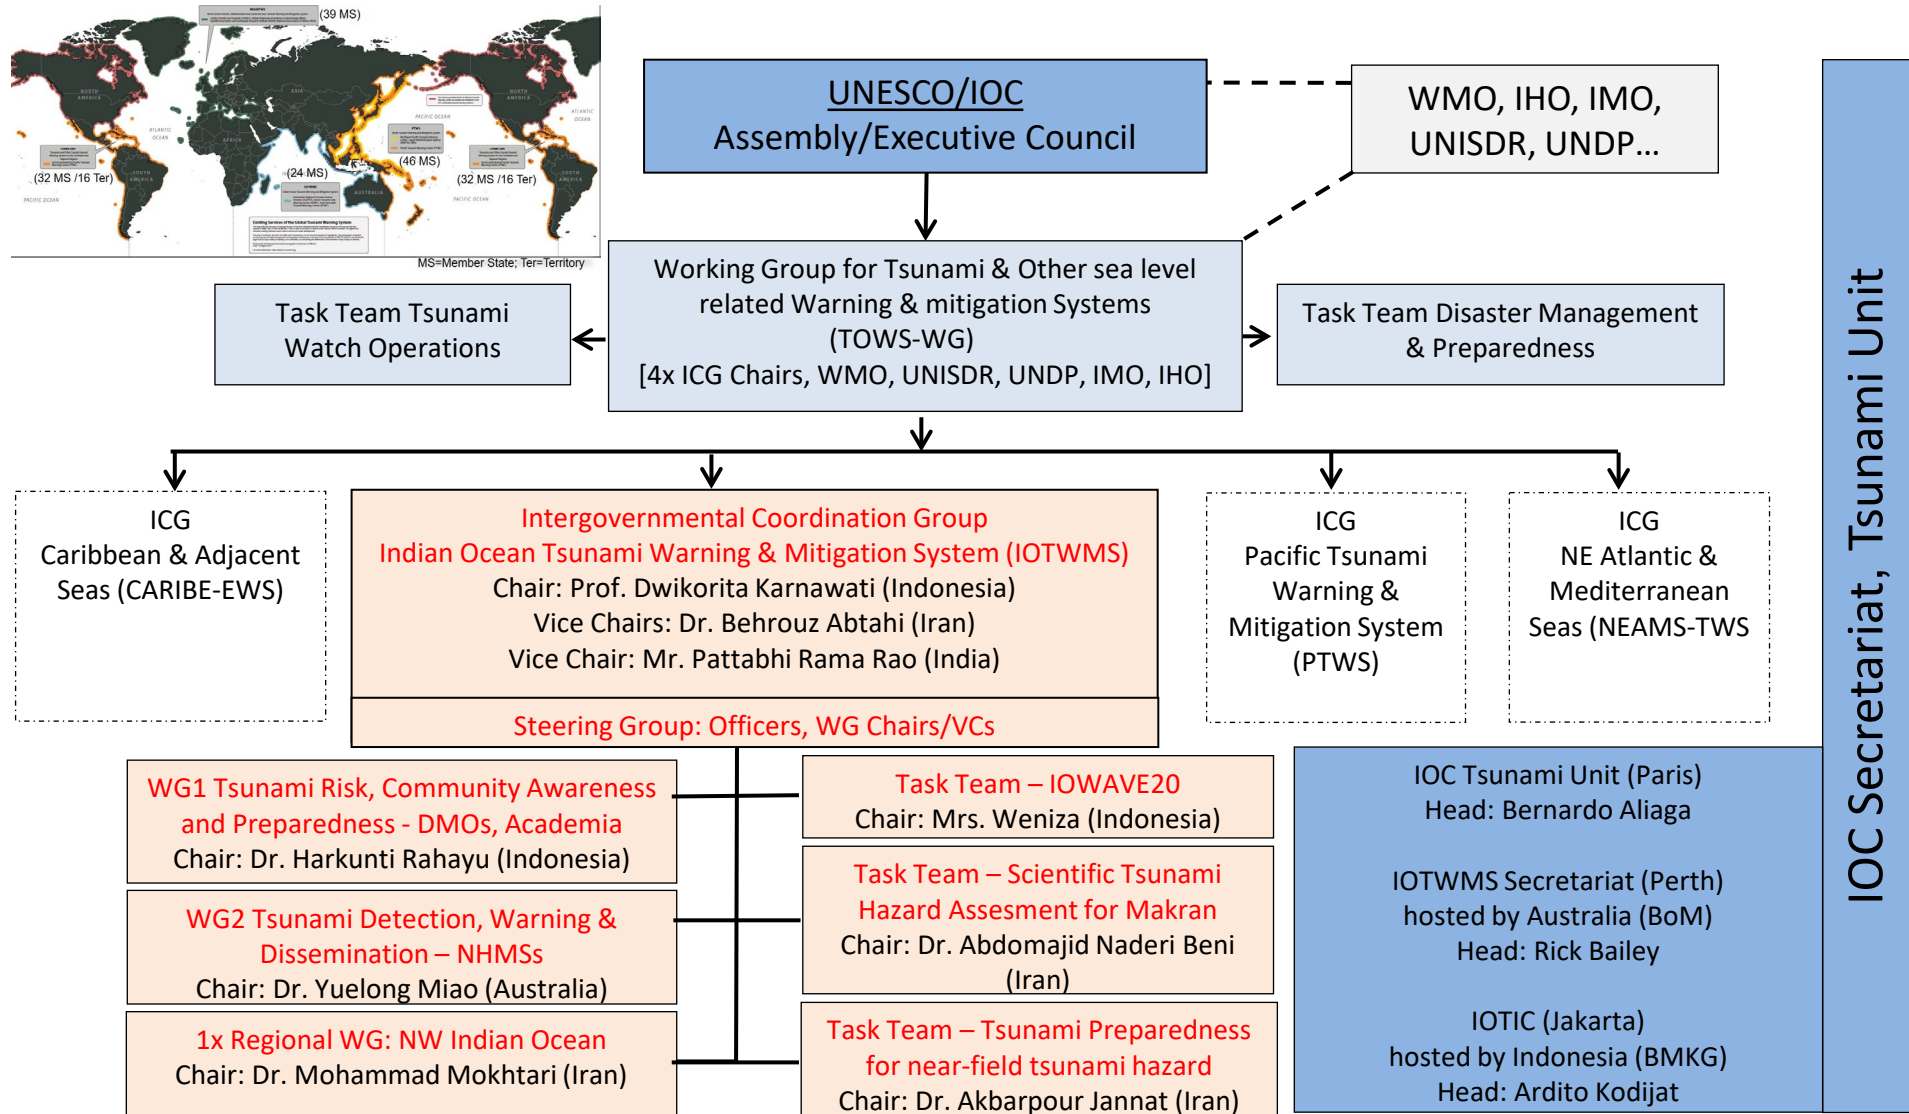

Communicate threat information and early warnings

Awareness and Response

Build national and community response capabilities

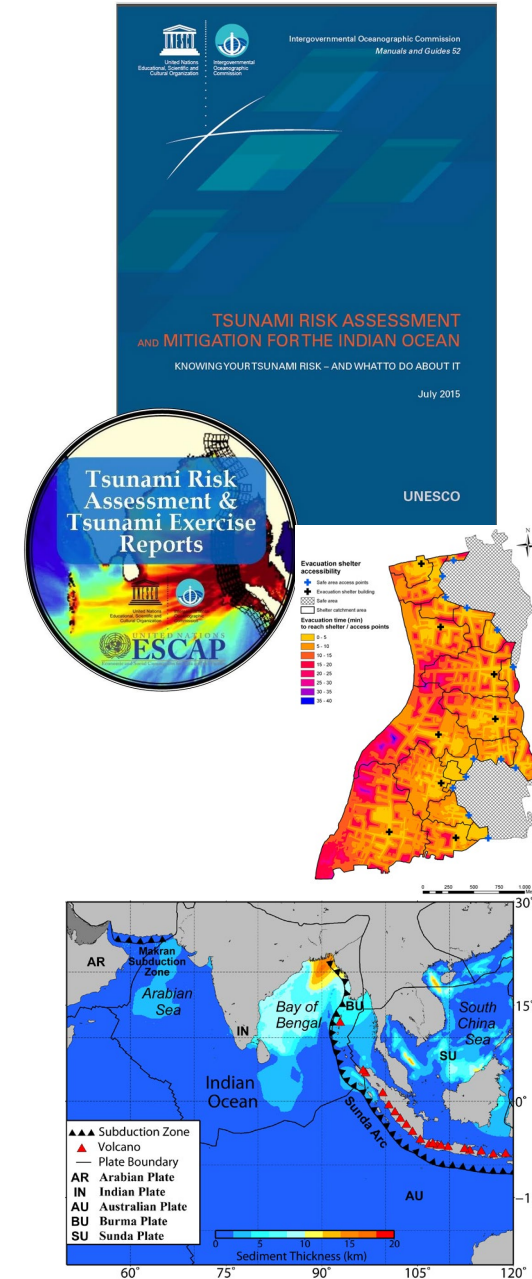

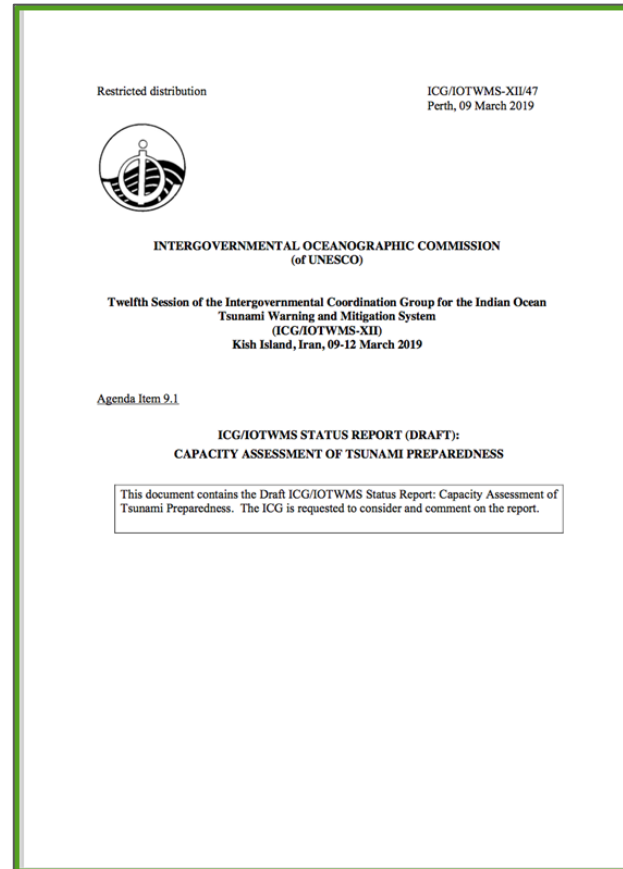

Governance

Pillar 1: Risk Assessment & Reduction

Working Group 1
Chair: Dr Harkunti Rahayu

Pillar 2: Detection, Warning & Dissemination

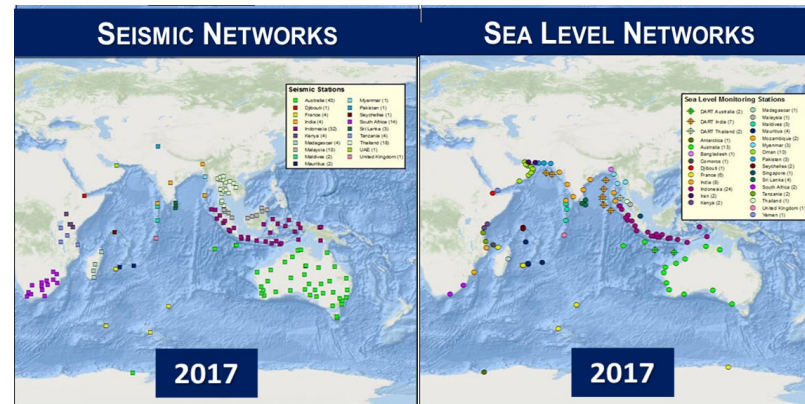

Working Group 2
Chair: Yuelong Miao

- Tsunami Service Providers (TSPs) (Australian India, Indonesia)
- National Tsunami Warning Centres (NTWCs)
- Sea level and seismic monitoring networks

Warning & Dissemination

Country/Province	State/Province	Country	Max1	Max2	Max3	Max4	ETA	TSW	Threat
CAROLINE TO KILBARRI	WESTERN AUSTRALIA	AUSTRALIA	10,040	20,224	23,876	28,530	14 Tag	5.3	Threat
KILBARRI TO JURIN BAY	WESTERN AUSTRALIA	AUSTRALIA	12,294	24,584	29,210	33,200	14 Tag	5.9	Threat
MORSEY ISLAND	BRITISH INDIAN OCEAN TERRITORY	BRITISH INDIAN OCEAN TERRITORY	13,358	13,200	13,362	31,734	0946Z 2011	2.7	Threat
MR EDMOND ISLAND	BRITISH INDIAN OCEAN TERRITORY	BRITISH INDIAN OCEAN TERRITORY	11,836	14,814	14,850	40,736	14 Tag	3.6	Threat
BRIGGS-GARCIA ISLAND	BRITISH INDIAN OCEAN TERRITORY	BRITISH INDIAN OCEAN TERRITORY	12,860	13,200	13,376	14,818	14 Tag	2.2	Threat
INDIA POINT GREAT & LITTLE NICOBAR ISLAND	ANDAMAN & NICOBAR	INDIA	1,860	2,262	2,580	22,180	0937Z 2011	4.8	Threat
KONKATA & SATHAL ISLAND	ANDAMAN & NICOBAR	INDIA	3,038	3,812	3,902	19,318	14 Tag	5.1	Threat
NORTH SENTINEL ISLAND	ANDAMAN & NICOBAR	INDIA	6,574	7,462	12,834	19,372	14 Tag	2.7	Threat

Pillar 3: Awareness & Response

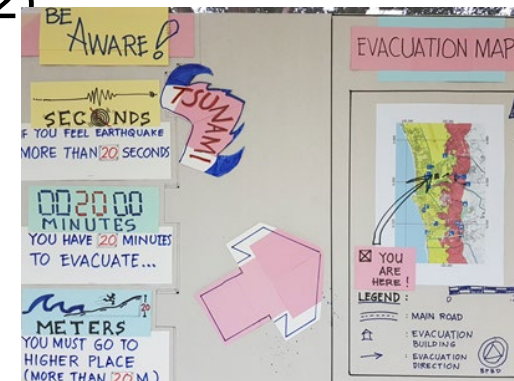

Working Group 1
Chair: Dr Harkunti Rahayu

IOTIC
Ardito Kodijat

- Education Material for NTCs, emergency managers, communities, schools, tourism, etc in multiple languages
- Indian Ocean Tsunami Ready (IOTR) Programme
- **Indian Ocean Tsunami Information Center (IOTIC)** supported by BMKG, Indonesia (2017-2022)

Regional Working Group: NW Indian Ocean

unesco

**Intergovernmental
Oceanographic
Commission**

**UNESCAP funded project
“Strengthening tsunami
warning in the North-
West Indian Ocean
through regional
cooperation”**

Phase 1 (completed)

- Development unified Probabilistic Tsunami Hazard Assessment (PTHA)
- National tsunami warning chains and Standard Operating Procedure development

India, Iran, Pakistan
Oman, UAE, Yemen)

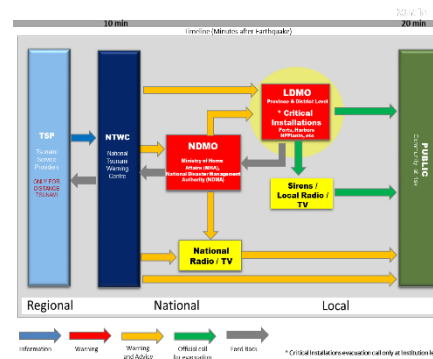

Phase 2a & 2b (nearly finished)

- Completion of PTHA and exchange of scientific knowledge
- Finalisation national tsunami warning chains and SOPs
- Identified best practices and capacity in inundation and evacuation mapping:

Phase 2c (proposed start 2023)

- Training in inundation modelling and evacuation planning for pilot communities

INDIAN OCEAN INFORMATION CENTRE 2017-22

- UNESCO IOC Tsunami Unit
- UNESCO-IOC ICG/IOTWMS Secretariat
- UNESCO-IOC ICG/IOTWMS SG / WGs / TTs
- UNESCO-IOC TOWS Task Team for Tsunami Disaster Management and Preparedness
- UNESCO IOC Tsunami Information Centers (CTIC, ITIC, NEAMTIC)
- UNESCO-IOC Ocean Teacher Global Academy Secretariat

- BMKG Geophysics
- BMKG InaTEWS
- BMKG Training Centre (STC OTGA)

25

Working with IOC Indian Ocean Member States (active participation ICG/IOTWMS)

Tsunami Ready Training Course
12 – 30 November 2021

This is an introductory-level training course providing the basic understanding of performance-based community readiness concept toward tsunami hazard based on 12 tsunami preparedness indicators.

The objective of this training course is to build the capacity of participants to enable them to provide assistance on building a tsunami ready community.

Learning Outcomes

After the course participants are expected to have knowledge, skills and experience to be able to:

- explain 12 indicators needed to establish the tsunami ready community.
- explain the overview of the tsunami ready development in Indonesia to be implemented in each country.
- advocate community to complete the 12 indicators.
- advocate school preparedness.
- advocate a certain community to fulfill the requirements for proposing tsunami ready recognition.

Target Audience

The target audience includes, but is not limited to the following:

- Disaster management officer (national and local)
- Government agencies and non-government organizations (NGOs) working on disaster management field
- Researchers of tsunami science background

Note: UNESCO is committed to promote equal access principles. Applications from minority or underrepresented groups are strongly encouraged.

Course Pre-requisites

Applicants are expected to:

- have knowledge and experience in disaster risk management will be an advantage
- have a good working knowledge in English

A Certificate of Participation will be issued to all participants who finish all mandatory task's completion.

Advance Tsunami Ready Training Course
27 September – 3 October 2022

The Advance Tsunami Ready Training Course will be conducted on Semester II, 2022. It is a continuation of the previous training (online- Basic Tsunami Ready Training Course). This training course provides the knowledge and skill to test the community's response capability. The course design will be like a Training of Trainers (ToT).

Course contents will cover presentation, discussion, sharing experiences on a case study of tsunami ready and practical sessions including a site visit to a tsunami ready community in Indonesia.

Learning Outcomes

After the course participants are expected to have knowledge, skills and experience to be able to:

- implement 12 indicators needed to establish the tsunami ready community in their country;
- encourage the community to develop tsunami community by assessing the 12 indicators;
- advocate community to complete the 12 indicators; and
- advocate school preparedness.

Target Audience

The target audience is 30 people from participants of the previous training course (Tsunami Ready Training Course) who had obtained the certificate.

Note: UNESCO is committed to promote equal access principles. Applications from minority or underrepresented groups are strongly encouraged.

Course Pre-requisites

Applicants are expected to:

- have successfully finished the Tsunami Ready Training Course and obtained the certificate

A Certificate of Participation will be issued to all participants who finish all mandatory task's completion.

STC Indonesia Advance Tsunami Ready OTGA Training Course in 2022

- **INCOIS in India** has been operating the International Training Centre for Operational Oceanography (ITCOcean) since 2013, providing several courses in support of Tsunami Programme in 2021/22
- **BMKG Training Center in Indonesia** now also serves as an OTGA Specialized Training Center (STC Indonesia)

Promoting TSUNAMI READY at the 7th Meeting GLOBAL PLATFORM for DISASTER RISK REDUCTION (GPDRR 2022) in Bali, Indonesia

The inauguration of Tsunami Ready Recognition of Tanjung Benoa community

Launching the Tsunami Ready board game and video series

Playing Tsunami Ready board game

Innovation Platform Booth: Recognizing Tsunami Ready Community

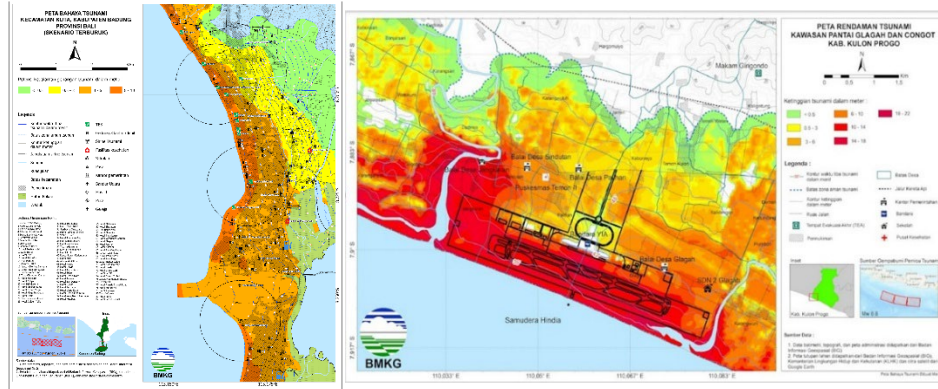

Mr Mohamed Djelid, Director of UNESCO Office Jakarta, handed the Tsunami Ready Board Game to Ms. Amina J. Mohammed, UN Deputy Secretary-General and Ms. Mami Mizutori, Special Representative of the Secretary-General for DRR and Head of UN Office for Disaster Risk Reduction (UNDRR) at the GPDRR.

- To promote the Tsunami Ready Programme, UNESCO-IOTIC and BMKG provided an exhibition at the Innovation Platform and launched the Tsunami Ready Communication Tools on the Ignite Stage of Rumah Resiliensi.
- In addition, the Tanjung Benoa community Tsunami Ready recognition was conducted as a part of promoting Tsunami Ready in the 7th GPDRR meeting in Bali

BEST PRACTICES of IMPLEMENTING TSUNAMI READY for CRITICAL INFRASTRUCTURE

BMKG has advocated **Kulonprogo International Airport (Yogyakarta)** and **Ngurah Rai Airport (Bali)** implement **Tsunami Ready**:

1. Developing tsunami hazard map for airport area
2. Evaluating tsunami evacuation facilities
3. Improving Airport Emergency Plan (including tsunami warning SOP)
4. Conducting earthquake and tsunami community education
5. Conducting tsunami drills
6. Providing/ensuring accessible earthquake information and tsunami warnings

Airport Tsunami Hazard Map

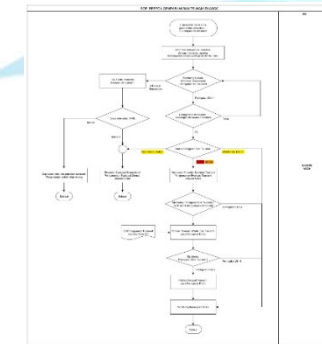

Evaluating Tsunami Evacuation Facilities

Earthquake and Tsunami Education for Airport Attendants

Airport Tsunami Drill

Including Tsunami Warning SOP in the Airport Emergency Plan

Providing Accessible earthquake information and tsunami warning

EARLY WARNING, EARLY ACTION: BRINGING the IDEA from GPDRR 2022 into ACTION

Cooperation and involvement of the Pentahelix (The government, private sector, media sector, academia, community) to accelerate the development of the End-to-end Early Warning System

Hotel Roof Top for
Vertical Evacuation

Room for Evacuation

Evacuation Simulation

The Vertical Evacuation
Shelter at the YIA

Evacuation Simulation to
Shelter Evacuation

- The hotel investment on the DRR had been a **good promotion on ensuring the safety and security of guests**
- 7 hotels in Tanjung Bena had committed to provide the vertical evacuation shelter:
 1. Peninsula Bay Resort
 2. Hotel Bena Sea Suites Villas
 3. Grand Mirage Resort
 4. Hotel Ion Bali Bena
 5. Hotel Rasa Sayang
 6. Hotel Novotel
 7. The Sakala Resort

The Yogyakarta International Airport evacuation shelter for airport officers and surrounding communities.

Indian Ocean World Tsunami Awareness Day Webinar 2021

INDIAN OCEAN YOUTH SHORT VIDEO COMPETITION ON TSUNAMI AWARENESS

10 November 2021

for more information: bit.ly/XXXXXXX

2021: A total of 79 videos were successfully submitted by participants from 9 countries:

- Bangladesh 3,
- India 5,
- Indonesia 24,
- Kenya 4
- Malaysia 12,
- Maldives 2,
- Pakistan 25,
- Seychelles 3, and
- Tanzania 2.

Five (5) independent judges evaluated the videos based on 6 assessment: criteria theme/topic, information, originality, impact, concept, creativity.

Three winners for each of the four IO regions

Challenges

- Tsunamis are fortunately rare, but this also makes it **hard to maintain awareness and preparedness**. When they do occur their impacts can be catastrophic
- **Tsunamis are “short-fuse” events and so there is not much time available to respond:**
 - **Near-field** tsunami threat... tsunami can arrive in as little as 10-20 minutes from a nearby source
 - **Even far-field** tsunamis, generated by sources on the other side of the Indian Ocean..... can arrive in hours.
- **Timeliness #1 priority** and **Accuracy #2 priority** for warnings

Challenges

Tsunamis are commonly generated by underseas earthquakes, but can also be caused by non-seismic or atypical sources, such as submarine landslides, volcano collapses, and certain atmospheric conditions. These can be even harder to detect and warn for.

Eg Krakatoa, Indonesia (1883, 2018)

Opportunities

The United Nations
Decade of Ocean Science
for Sustainable Development
(2021-2030)

- **UN Ocean Decade 2021 – 2030** Tsunami Programme.. includes Science Plan to be developed by TOWS-WG
- Development of Multi-hazard Framework by **WMO**
- Working closer with **UNDRR, UNDP, ...**
- Utilising the expertise of **other international activities**, such as: Kyoto Landslide Commitment 2020, Augmenting Tsunami Monitoring Steering Committee, Joint Task Force Scientific Monitoring And Reliable Telecommunications (SMART) cables, German Tsunami Risk Project, UNESCAP Project Strengthening Tsunami Warning in the North-West Indian Ocean through Regional Cooperation
- **Lessons to be Learnt** from past and future tsunami events

ICG/IOTWMS Way forward Next Session

1. **Review and implement Science & Implementation plans** to be developed by UN Ocean Decade Tsunami Programme Science Committee
2. **Implement outcomes from Multi-Hazard Early Warning Conference (MHEWC)** in Indonesia, May22 and translate Words-into-Action in support of UN Sec General call for all communities to have access to early warning systems by 2027.
3. **Expand number of Tsunami Ready (TR) communities and consider critical infrastructure**
4. **Utilise lessons learnt from UNESCAP project in NWIO to benefit rest of Indian Ocean**
5. **Secretariat to work with IOTIC, WGs and Training Centres/Programmes to develop work plans to address issues identified in 2018 IOTWMS Capacity Assessment and other assessments**
6. **Improve access to real-time data**
7. **Focus on helping NTWCs develop SOPs for warning of non-seismic and complex source tsunamis following advice from TOWS-WG in early 2023**
8. **SOP training workshops: western Indian Ocean (many SIDS and LDCs) and eastern Indian Ocean (2023)**
9. **Next IOWAVE Exercise to be held in Sep/Oct 2023**
