MARTAB

PANGANDARAN BEACH

The large number of visitors to Pangandaran Beach creates a large density of humanity in the area especially during weekends and holiday seasons

TSUNAMI HAZARD MAP

However, this area is very prone to tsunami due to the existence of the Megathrust Zone as the earthquake source in the south of Java. The National Earthquake Study Center (PUSGEN) has defined that this source has a maximum magnitude at M8,7 (worst case scenario) and is able to generate a tsunami.
