

Assessment: Identifying existing data and knowledge and gaps

Group Discussion

Some questions to support group discussion:

- Are there tsunami hazard maps for your country?
 - What earthquake sources was used?
 - What was the quality of the DEM
 - Have evacuation routes been identified?
- How confident are you in the quality of the digital elevation model for your country?
- Are there places with good digital elevation models but no tsunami hazard maps?
- Do these places represent key economic, social, cultural areas for your country?
- How would you prioritize areas to implement tsunami ready programme?

Common Inundation Survey Variables
