

Bangladesh

Scenarios Exercised:

- Andaman Trench (4 Oct)
- Heard Island (18 Oct)
- Makran Trench (11 Oct)
- Java Trench (25 Oct)

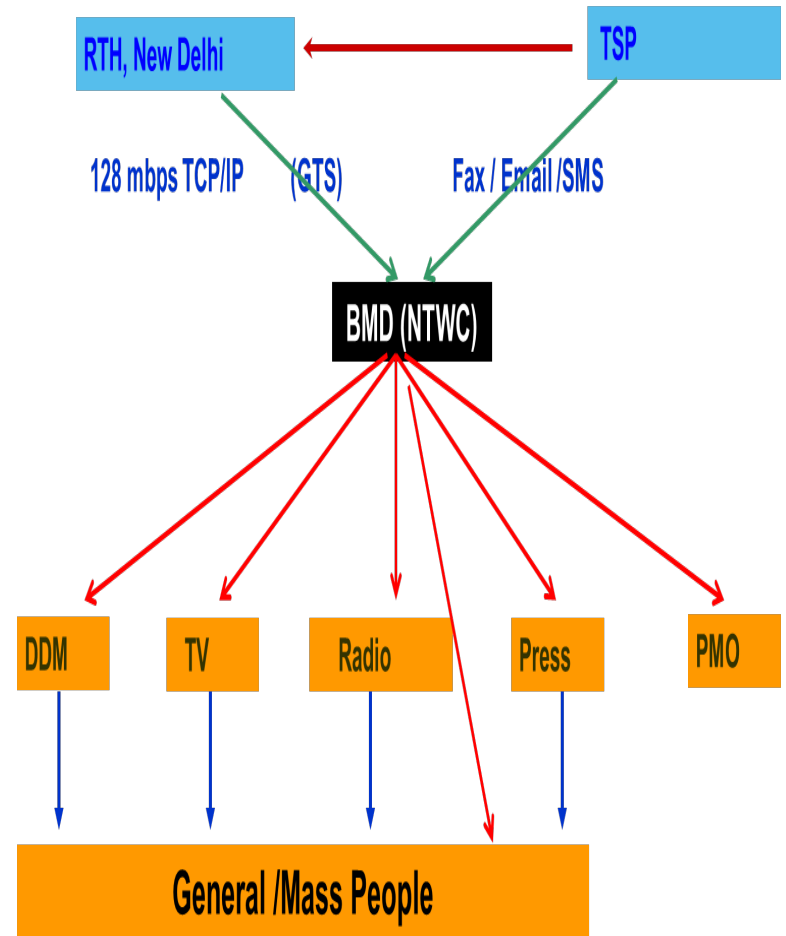

During IOWave23 Exercise at Seismic Observatory & Research Center

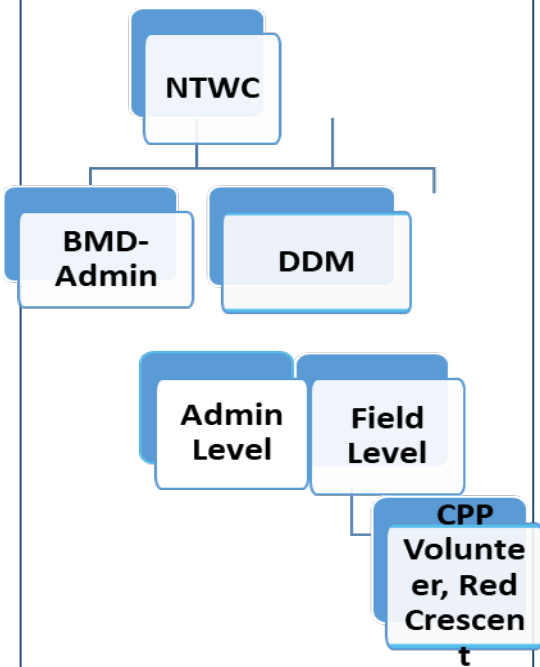

National Tsunami Warning & Mitigation System

As a NTWC BMD write a letter to the high officials of DDM, CPP, Coastguard, Port Authority to aware about the IOWave2023 exercise, then few days later we make an online meeting with DDM how can we perform the exercise. We decide to make table-top exercise with local level. We completed End to End .

National Organisation of Exercise IOWave23

Exercise Participants

Lessons Learnt

This Exercise was very much helpful for Bangladesh because most of the local level disaster managers were not much aware what to do in case of a real tsunami disaster. This exercise encouraged them how quickly to send messages to the stakeholder at the real time event.
