# Aim of the workshop

---

**The aim is to lay a strong foundation for the SEAMARCS project by:**

- Diagnosing the project's scope
- Assessing current conditions
- Aligning stakeholders
- Refining objectives
- Review timeline

# Structure of the workshop

---

1

**24 of September (Full day)**

Project Diagnosis and Strategic Focus

2

**25 of September (Full day)**

Presentation of Scoping Reports and Refining  
Key Components of the Project

3

**26 of September (Half day)**

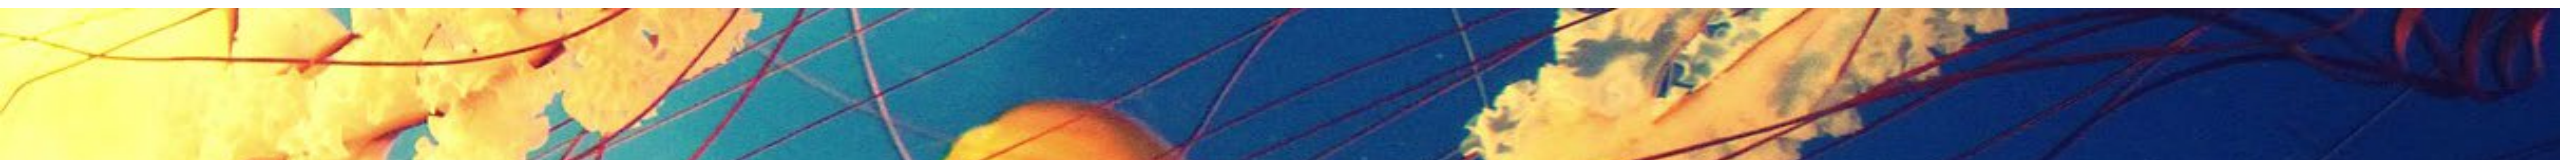

Review and Adjust the project Timeline

# Day 1 of the workshop

---

## Project Diagnosis and Strategic Focus

- Clarify what the project will directly address: Will the sea-level stations prioritise short-fused hazards *or* on long-term sea-level rise mitigation and adaptation?
- Discuss the current landscape of sea level monitoring stations

## Day 2 of the workshop

---

### Scoping Reports and Refining Key Components of the Project

- Share findings from scoping reports including; stakeholder mapping, existing sea-level stations, other initiatives, and existing policies
- Refine key components of the project in four (4) working groups:
  1. Theory of Change
  2. Logical Framework and Results Framework
  3. Monitoring & Evaluation
  4. Implementation Strategy

## Day 3 of the workshop

---
